PROFESSIONAL SUMMARY

- Java Full Stack Developer with 5+ years of experience building and supporting enterprise applications in banking, automotive manufacturing, and enterprise IT environments.
- Hands-on with Java 17 and Java 21, Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Spring Batch, Hibernate, and RESTful microservices, with front-end experience in React.js, Redux, Angular, TypeScript, and JavaScript.
- Build cloud-native services on AWS using Lambda, SQS, DynamoDB, Aurora, S3, EC2, ECS, API Gateway, IAM, and CloudWatch, and containerize them with Docker, Kubernetes, and Red Hat OpenShift.
- Develop event-driven services with Apache Kafka, JMS, and RabbitMQ, including producers, consumers, consumer groups, retry handling, and dead-letter queues.
- Experienced in migrating legacy Java/J2EE and batch applications to Spring Boot microservices, and in large-scale data migration with AWS DMS, AWS Glue, and Spring Batch.
- Write secure, well-tested code: Spring Security, AWS IAM, Cognito, SSM Parameter Store, and Fortify scans for protecting sensitive and PII data; JUnit, Mockito, Selenium, and TestNG for unit, integration, and automation tests.
- Work in Agile/Scrum teams using Git, Maven/Gradle, Jenkins, GitHub Actions, SonarQube, and Splunk; comfortable with code reviews, sprint delivery, and production support.

TECHNICAL SKILLS

Languages	Java 17/21, Java 11, Java 8, JavaScript, TypeScript
Core Java	OOP, Collections, Streams/Lambdas, Multithreading, Exception Handling, Design Patterns
Backend & Frameworks	Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Spring Batch, Spring AOP, Hibernate, JPA, JAX-RS
Microservices & APIs	Microservices, RESTful APIs, SOAP, JSON, XML, API Gateway, Event-Driven Architecture
Frontend	React.js, Redux, Angular, AngularJS, TypeScript, JavaScript, HTML5, CSS3, Bootstrap, jQuery, AJAX
Messaging & Streaming	Apache Kafka, Kafka Topics, Producers, Consumers, Consumer Groups, DLQ, JMS, RabbitMQ
AWS Cloud	Lambda, SQS, S3, EC2, ECS, DynamoDB, RDS, Aurora, DMS, Glue, API Gateway, IAM, Cognito, CloudWatch, VPC
Containers & CI/CD	Docker, Kubernetes, OpenShift, Jenkins, GitHub Actions, Git, Bitbucket, Maven, Gradle, SonarQube
Databases	Oracle, PostgreSQL, MySQL, SQL Server, DB2, DynamoDB, MongoDB, Aurora, HQL, PL/SQL
Testing	JUnit, Mockito, Selenium WebDriver, TestNG, Jasmine, Karma
Monitoring & Security	Splunk, AWS CloudWatch, Spring Security, AWS IAM, Cognito, SSM Parameter Store, Fortify
Servers & Tools	Apache Tomcat, JBoss, IntelliJ IDEA, Eclipse, Spring Tool Suite, Visual Studio Code, JIRA, Linux/Unix
Methodologies	Agile/Scrum, TDD, SDLC, CI/CD, UML

PROFESSIONAL EXPERIENCE

Truist | Charlotte, NC **Mar 2025 – Present**

Senior Java Developer

- Develop and maintain microservices with Java 17, Java 21, and Spring Boot for a retail banking platform that supports customer onboarding, account servicing, and third-party financial vendor integrations.
- Migrate legacy customer-account applications to Spring Boot microservices on OpenShift, improving maintainability and cloud readiness for banking teams.
- Build data migration pipelines with AWS DMS, AWS Glue, Oracle, Aurora, and DynamoDB to move and transform customer account and transaction records, with validation and reconciliation checks.

- Implement serverless integration services with AWS Lambda and Amazon SQS to process vendor, payment, and partner data feeds reliably and asynchronously.
- Develop Kafka producers and consumers, with retry handling and dead-letter queues, to publish account and transaction events across services.
- Write RESTful APIs and persistence code with Java 17/21, Spring Boot, and Spring Data JPA, supporting React-based banking operations screens.
- Apply security controls for regulated banking and PII data using IAM roles, least-privilege policies, security groups, and AWS SSM Parameter Store, and fix findings from security scans.
- Maintain GitHub Actions pipelines for build, unit testing, security scanning, containerization, and multi-environment deployment.
- Write JUnit and Mockito tests, take part in code reviews, and work with QA, DevOps, and security teams on releases and production issues; use Microsoft Copilot to speed up routine development tasks.

Environment: *Java 17*, *Java 21*, *Spring Boot*, *Spring Data JPA*, *React*, *Node.js*, *Python*, *AWS DMS*, *AWS Glue*, *Lambda*, *SQS*, *DynamoDB*, *Aurora*, *Oracle*, *IAM*, *SSM Parameter Store*, *Kafka*, *OpenShift*, *Docker*, *GitHub Actions*, *REST APIs*, *JUnit*, *Mockito*, *Agile/Scrum*.

Bosch | India **Feb 2022 – Nov 2023**

Senior Java Developer

- Developed data migration applications with Java 11, Spring Boot, Spring Batch, and Oracle to move automotive parts, supplier, inventory, and production-order data to AWS.
- Built Spring Batch jobs using ItemReader, ItemProcessor, ItemWriter, and JobLauncher to process high-volume plant and supply chain data files.
- Implemented data validation, transformation, error handling, and retry logic so migrations of parts and order records could restart without data loss.
- Developed React screens that let manufacturing and supply chain teams start, monitor, and review migration runs.
- Built RESTful services with Spring Boot to connect migration components with other enterprise systems such as inventory, procurement, and production planning.
- Containerized applications with Docker and deployed them on Kubernetes and Red Hat OpenShift; set up Jenkins pipelines for automated deployments.
- Supported mainframe batch scheduling with JCL and used Splunk for log analysis and troubleshooting during plant-data load windows.
- Wrote JUnit and Mockito tests, and took part in Agile ceremonies, design discussions, documentation, and code reviews.

Environment: *Java 11*, *Spring Boot*, *Spring Batch*, *React*, *AWS*, *Oracle*, *SQL*, *JCL*, *Docker*, *Kubernetes*, *Red Hat OpenShift*, *Jenkins*, *REST APIs*, *Splunk*, *JUnit*, *Mockito*, *Git*, *JIRA*, *Linux/Unix*.

HCL Technologies | India **Aug 2020 – Jan 2022**

Java Developer

- Developed Spring Boot, Spring MVC, and Spring AOP microservices with JPA for client enterprise and mobile applications, deployed on AWS.
- Built RESTful APIs and backend services that return JSON to web and mobile front ends; wrote SOAP and REST web services using JSON and XML for enterprise system integration.
- Wrote Kafka producers and consumers to process data in real time and exchange messages between services.
- Developed AWS Lambda functions in Java and Python and integrated DynamoDB, RDS, EC2, and CloudWatch.
- Deployed Spring Boot services with Docker, Kubernetes, and Red Hat OpenShift, and configured OpenShift resources for scaling.
- Set up Jenkins and Bitbucket CI/CD pipelines, wrote JUnit tests, and handled defect fixes and production support in Agile/Scrum sprints.

Environment: *Java 8*, *Spring Boot*, *Spring MVC*, *Spring AOP*, *JPA*, *AWS*, *Kafka*, *Docker*, *Kubernetes*, *OpenShift*, *DynamoDB*, *RDS*, *Lambda*, *EC2*, *CloudWatch*, *REST*, *SOAP*, *JSON*, *XML*, *Jenkins*, *Bitbucket*, *JUnit*.

EDUCATION

Master of Science in Business Analytics
Lewis University, *Romeoville*, *IL*
